

Automotive Electrical Work Safety SFS 6002 Training

SFS 6002 Training for Professionals Working with Electric and Hybrid Vehicles. Ensure safe working practices and meet the competence requirements of the industry.

Persons carrying out repair and maintenance work on electric or hybrid vehicles, as well as those working in supervisory and technical expert roles, must be sufficiently familiar with the hazards of electricity. This training provides content tailored for the automotive sector in accordance with the SFS 6002 standard. The training must be renewed every five years.

The Automotive Electrical Work Safety SFS 6002 training covers working methods, legislation and standards related to electrical safety, as well as the specific characteristics of electric and hybrid vehicles. Particular emphasis is placed on vehicle technology and the safe performance of work in the workshop.

Successful completion of the training is required nationally for all persons carrying out service and repair work on electric or hybrid vehicles, including those working in supervisory, operational and expert roles. The automotive sector recommends this training for everyone who works in the same workshop area where electric or hybrid vehicles are repaired.

Kenelle koulutus sopii?

mechanics
body repair technicians
workshop supervisors
workshop managers
persons working in technical expert roles

Koulutuksen sisältö

key electrical safety regulations
requirements for the maintenance and repair of electric and hybrid vehicles
identification and structure of electric and hybrid vehicles
working practices and work safety when working with electric and hybrid vehicles
Automotive Electrical Work Safety SFS 6002 exam
